Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

DETAILED ACTION

Allowable Subject Matter

Claims 1-13 are allowed in view of the prior art.

The following is an examiner's statement of reasons for allowance:

As to claims 1, 8, and 10-13, the prior art of record, taken alone or in combination, fails to disclose or render obvious a method and system for using wind velocity to detect a windshear or other dangerous condition in the atmosphere in front of an aircraft, in combination with the rest of the limitations of the above claims.

The applicant's arguments detail the reasons for why the claimed invention reads over the prior art. In particular, the applicant's invention uses actual wind velocities detected by light reflections to determine the presence of dangerous atmospheric phenomena. The prior art, however, detects the acoustic compressions of an atmosphere to determine the dangerous conditions, not the wind velocities caused by the conditions. Basically, "the acoustic compressions would not traditionally be categorized as 'wind' in the same way that acoustic emissions from a loud speaker would not be considered to be a 'wind'" (page 7).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. A laser Doppler velocimeter to Vahala et al (5,272,513).
